

Dear Parents,

We hope this map will help you and your child identify the safest route to school, taking note of where sidewalks are available and where the crossing guards are located.

Your child should color or circle where the crossing guards, your house, and Boone are located on the map. Then please help your child draw the safest route to school. As you do, you can talk about other things to watch out for, such as alley crossings, streets with and without four-way stop signs, areas where they might need to walk their bike because of crowded sidewalks, etc.

The kids will receive a special prize for completing their map and showing it to their teacher by Thursday. We'll also be showing them a bike safety video this week to help them learn more about walking and biking safely to school.

We hope that this Friday you'll join your child on a bike or walk to school so you can practice all they've learned together!

Thanks!

Audrey Robertson, Amy Tremper and Brittany Dyer
